

Point of Care Ultrasound: Not Just for Procedures Anymore

Background

Point-of-care Ultrasound (POCUS) refers to the use of portable ultrasound technology to make diagnostic and therapeutic decisions in real-time at the patient's bedside. POCUS can be used by general internists and sub-specialists to accurately diagnose, monitor, and treat a wide-spectrum of disease processes. The introduction of smaller, hand-carried ultrasound (HCU) machines has led to a rapid expansion in the use of POCUS in recent years, including practicing physicians, residency programs, and medical schools. POCUS has the potential to transform the way internists provide patient care by providing real-time visual data to rapidly inform clinical decision-making, while encouraging a "return to the bedside" and more direct patient contact.

Attendees

Attendees of the workshop will get an overview of point-of-care ultrasound, including key clinical practice applications. After a brief multi-media introduction session, attendees will engage in hands-on learning, acquiring ultrasound images on live-models with the guidance of expert facilitators. Areas that will be covered include basic cardiac, lung, and vascular ultrasound. If you are interested in learning how it can fit into your practice, this session is for you!

**Saturday, October 27, 2018
2:00 - 5:00 pm**

Methodist Hospital Ballroom, 8511 W. Dodge Rd,
Omaha NE 68114

This session follows the
Nebraska American College of Physicians
Annual Scientific Meeting
October 26-27, 2018

Free for conference attendees
\$10 for non-attendees

CME & MOC

The Metro Omaha Medical Society designates this conference for a maximum of 3.00 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity. This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Nebraska Medical Association (NMA) through the joint providership of the Metro Omaha Medical Society and the Nebraska Chapter of the American College of Physicians. The Metro Omaha Medical Society is accredited by the Nebraska Medical Association to provide continuing medical education for physicians.

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 3.00 MOC points in Medical Knowledge in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. Participants will earn MOC points equivalent to the amount of CME credit claimed for the activity. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC points.
